Third Five –Year Remedy Review Report for Savannah River Site Issued

The U.S. Department of Energy, the U. S. Environmental Protection Agency, and the South Carolina Department of Health and Environmental Control have issued the Third Five-Year Remedy Review Report for the Savannah River Site (SRS). The report evaluates the remedies that have been selected at all SRS operable units (OUs) with issued Records of Decision (RODs), Interim RODs, or Explanations of Significant Differences (ESDs) to determine whether the remedy remains protective of human health and the environment.

The report includes 45 OU-specific reviews of RODs, Interim RODs, or ESDs in accordance with Resource Conservation and Recovery Act and/or Comprehensive Environmental Response, Compensation and Liability Act requirements. These OUs are in varying stages of remediation (e.g., under construction, in active remediation, or remediation completed).

The remedies selected for all of the OUs at SRS that are included in the report are functioning as intended by the OU-specific decision documents. No issues were identified as a result of the review.

Copies of the Third Five-Year Remedy Review Report are available in the Administrative Record. The Administrative Record is available in the information repositories listed below:

DOE Public Reading Room at the Gregg-Graniteville Library at the University of South Carolina (USC)-Aiken campus in Aiken, SC; and Thomas Cooper Library Government Documents Department at USC in Columbia, SC

Hard copies of the Third Five-Year Remedy Review Report are available at the following locations:

Reese Library at Augusta State University in Augusta, GA; and
Asa H. Gordon Library at Savannah State University in Savannah, GA
